"It's been pleasure to attend the class and invest my time in this very in-depth master class. I enjoyed going through all the modules and it's practice areas which I could then apply to quizzes at the end of each module. I loved to participate in our discussion of the results (of each participants) and finding out that every person have different approach to problem solving and also have different point of views to various CLP topics."

Big thank you of course goes also to all your team, especially to Ali who's unbelievably broad knowledge (and memory!) never stop impressing me." Zuzana Hovorka, Bartoline, 12<sup>th</sup> September 2022
